

## Successful exhibition at Elecrama 2016

### Feb 2016

Precious metal contacts and precision stampings specialist, Samuel Taylor Limited (STL), recently returned from Elecrama 2016 Bangalore India, where a high level of interest was achieved in STL's contact technology.

Carl Siviter, Sales Manager , " ...we had good and wide ranging discussions with friends old and new, during the 5 day event and would like to thank everyone who came to our stall..."

The exhibition is a major focal point for electrical device manufacturers both in India and the wider geographical area. STL showcased its inlay bi-metal strips and high speed in-press riveted assemblies.

James Cameron details bi-metal.

### Notes to the Editor

Samuel Taylor Limited (STL) is a Redditch based manufacturer of precious metal contacts and contact materials. Established in 1895, the business was acquired by the present family in 1899 and is now in its 4<sup>th</sup> generation of owner-managers. Aiming to create the best product solutions for each application whilst also being globally cost competitive, STL pursues a long-term approach essential to the component and sub-assembly industry.
